# Safety Bulletin

FY 17-05

## ATTENTION

### DPW Snow Melt Pick Up Plan

### The sidewalk is covered in snow!

Every year during snow and ice events employees slip and fall causing significant injury. Be proactive and pick up your ice melt and salt when the Directorate of Public Works makes it available.

The building **facility manager** is responsible for making sure that there is a snow and ice removal plan for their sidewalks and entrances.

**Step 1:** Determine how many entrances there are for your facility

**Step 2:** Request 1 bag per entrance to ensure that you have enough salt to cover your areas.

**Step 3:** Travel to Richardson Hall building 1730 and enter through the warehouse door inside the gated compound

**Step 4:** Sign in at the warehouse office to request your ice melt and salt.

**REMEMBER PICK UP ICE MELT  
BEFORE IT SNOWS!**

**BE ALERT, STAY ALERT, STAY SAFE!**
